

Enhance Correctional Health with Virtual Specialty Care

eConsults are secure, online consultations between primary care teams and board-certified specialists.

Correctional healthcare teams can enable rapid, high-quality access to specialty medical expertise using eConsults, while reducing the risks and challenges related to offsite transport.

eConsults can be used to:

- Ask a question
- Consult for a patient
- Improve quality of referrals
- Gain Insight
- Interpret a lab
- Review medications

Challenges we help overcome:

- Get **same-day insights** to reduce excess wait times
- **Improve access** to specialty care and reduce litigation risk
- **Treat on-site** more often and avoid costly, complex transfers

Use Case Examples for Correctional Health

Condition	RubiconMD specialist recommendation
Chronic Pancreatitis	Gastroenterologist reviews appropriate medication options for corrections, along with educational insights to help inform the ongoing care plan.
Knee injury	Orthopedic specialist presents three paths for managing osteoarthritis, with applicable treatment plans for each.
Atopic dermatitis	Dermatologist provides recommendations on different diagnosis and therapies applicable to the correctional care setting, avoiding a referral.
Severe foot pain with suspicion of blood clot	Specialist recommends further imaging and lab orders to explore the cause of the pain and rule out blood clots or other risks.
Hepatitis B	Specialist presents immediately actionable recommendations to help optimizing long term patient outcomes.

How RubiconMD Specialty eConsults work

1

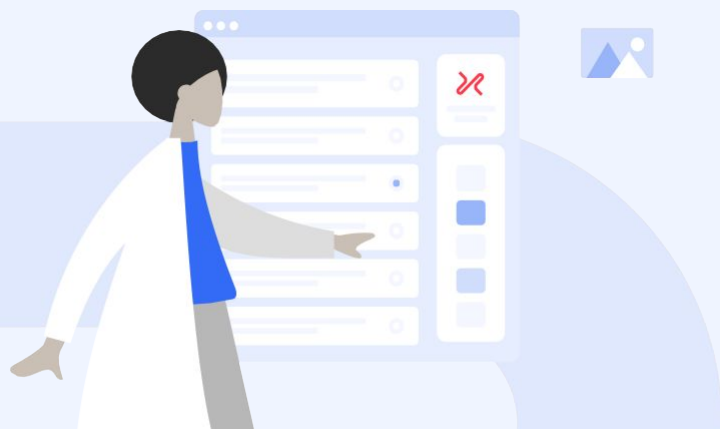

The clinician submits a question in the RubiconMD platform.

2

Our specialist responds within a few hours and answers any follow-up questions.

3

The clinician uses eConsult insights to inform the care plan and treat on site.

RubiconMD has served corrections providers for 9+ years
